

# Symmetry Mobile

Next-Generation Applications for the Connected Property

## Products

The Symmetry Mobile Suite extends your operational and player loyalty reach directly where needed most, to your stakeholders. The Symmetry Mobile Suite consists of Host, Meter and Floor applications which deliver unprecedented real-time performance and insight, through a single source AI and ML platform.

### Host

Symmetry Host takes today's CRM systems to the next level, integrating data from any source and dynamically creating new relationships based on your rules and best practices. The capabilities grow as you grow. Friend of VIP? Total-property recommendations? Guest preferences? Trip worth?

### Meter

Symmetry Meter enables floor personnel to capture meter data in a single snapshot - entering, submitting and validating meter data in real-time in one step. Data input can be done using voice, camera or keypad. Proactive meter awareness where it knows number of meters and meter names in advance of capture. Additionally, slot image is stored for additional levels of validation. Compliance and Audit become efficient processes.

### Floor

Symmetry Floor places your gaming floor on the palm of your hand by displaying and analyzing real-time floor metrics, performance and guest play.
